Open Recalls

Recall #: 23W5 | HEAT SHIELD AND TURBO HOSE Recall Date: 2017 May 23

Recall Description

An underbody heat shield may not be long enough to sufficiently protect the right drive half-shaft grease boot from heat. The radiant heat may damage the boot and this could lead to a grease leak from the boot. If leaking grease comes into contact with heated surfaces of the exhaust system and/or diesel particulate filter (DPF), it could lead to a vehicle fire.

Remedy

At no cost to customers, the driveshaft heat shield will be replaced on all affected vehicles. Certain vehicles within a specific VIN range will also have the upper boost hose replaced.

This recall was open as of the date/time that this report was generated. For more information, or to find out if the recall has been closed, please contact VOLKSWAGEN or visit [Volkswagen's website](#).

Recall #: 94L9 | HEADLAMP CAPS Recall Date: 2019 Jun 11

Recall Description

The headlights are not permitted to have a horizontal adjustment for vehicles certified according to regulatory requirements. The horizontal adjuster is blocked from further adjustment by means of a cap (after the initial adjustment is performed in the production process). Some vehicles did not have the required cap installed. Incorrectly adjusted headlights may result in reduced visibility (for the driver and other motorists) which could increase the risk of a crash.

Remedy

Inspect and, if necessary install missing headlight adjusting screw caps.
